Local Power Worldwide

PowerBox 2

An off-grid power source in a secure, compact box with an adaptive modular design. Up to 30kWh battery storage to power telecommunications, security CCTV, lighting, and more.

Key assets include:

Remote deployability

Off-grid solution

Convenient charging in emergency situations

Adaptive modular design

ණුණු Integrate your technology

Bespoke integrations / custom design service

Compact 1200mm x 1200mm footprint

Repeatable and scalable

Superior wind loading characteristics

Galvanised based with powder coat option

Anti-vandal door hinges

Deployable jack legs for stabilisation

Can be configured as a **UPS** function

GPS tracker for precise location of assets

+44 1981 241668

PowerBox 2 Features

Remote monitoring

- 7" Touch screen control panel
- Remote monitoring and network switch enabled along with a modem for integration of third party equipment

Energy storage

- Battery ranges of AGM to LiFePO4 available
- Expandable battery storage up to 30kWh
- Range of extensive DC outlets from 10-60V
- Modular design to include any of the following: methanol fuel cell, hydrogen fuel cell, and a 2kw generator configured for 80% sustainable fuels
- 3kWP AC option available

Strategic design

- 325wP per side East/South/West configuration
 1300w PV capacity (including North side)
- Unique PV combiner box optimises solar tracking and enhances performance

Roof & Mast

- Withdrawable roof allowing auxiliary equipment to be deployed
- Internal pneumatically operated mast (with a 25kg rating) extends to a height of 6 metres. Retracted, it is fully concealed within the PowerBox2.
- Two side doors permit access to the control panel and rear of the unit where fuel-cell and other bolt-on equipment can be utilised.

PowerBox 2 - By You

Ask our team for special integration with your auxiliary equipment, customisable to your requirements.

Solar

PV panels are installed on all 4 sides for ease of deployability. The PowerBox 2 wraparound solar removes siting issues of ensuring the product is South-facing.

Transportation

The PowerBox 2 is designed with ease of distribution in mind - multiple units can fit closely together in a trailer allowing for reduced transport costs.

Weight: 650Kg+

Length: 1200mm

Height: 2200mm Width:1200mm
